

An aerial night view of a city, showing a dense grid of buildings and streets illuminated by streetlights. The scene is captured from a high angle, looking down on the urban landscape. The lights create a warm, golden glow against the dark night sky. The buildings are of various heights and styles, some with lit-up windows. The streets are visible as a network of lines, with some showing traffic. The overall atmosphere is one of a bustling, modern city at night.

EXA

Corporate overview

**Making scale
sustainable and
growth effortless**

**We are driven
by the desire
to create and
share growth.**

Today's hyperconnected reality is driving network requirements to new levels — both in terms of volumes and bandwidth, but also flexibility, agility and security. Infrastructure and connectivity are key to maintaining, sustaining, and growing market leadership. As dedicated providers and builders of infrastructure, EXA is delivering a faster connected world.

EXA expertise puts you on a path to success.

Over 20 years we've established our reputation for building robust, leading edge infrastructure to facilitate the world's ever expanding digital needs, which include:

- Mission-critical networks for governments and enterprises
- Hyperscale infrastructure for the world's most innovative and influential businesses
- Ultra-low latency networks for Financial, Gaming and Broadcast sectors
- Expansive connectivity to underpin carrier, mobile and internet backbones

Hyperconnectivity across land, sea and cloud.

Why is EXA the trusted partner for hyperscale internet backbones? Our extensive terrestrial and subsea fibre network provide connectivity for massive digital platforms that increasingly dominate. Unsurprisingly, they require extreme bandwidth and continuous infrastructure investment — but that's the challenge we excel at.

EXA offers the absolute lowest latency between North America and Europe. This enables Fintech, Gaming, collaboration and VR platforms to deliver highly responsive applications to its users. To compete in this realtime environment, companies choose EXA for reliability, security and ultra-low latency connections.

NY to LDN in 59 milliseconds

Enjoy the lowest latency Transatlantic link available.

Our products and services

Prepare for future growth with world-class infrastructure.

Our unique combination of global assets, deep industry expertise and firm commitment to future investment is unmatched in our field. These are the foundations on which confidence can be built, bandwidth can be scaled and future growth, assured.

Transport & infrastructure

Where need meets sustainable capacity

Data-intensive services and applications, drive ever increasing bandwidth demand across the internet and private networks. EXA's suite of services ensure our clients a highly scalable bandwidth, whatever their present or future needs. With the flexibility to tailor their network to their own unique requirements.

Wavelength

Optimal performance for seamless delivery

EXA delivers Wavelength services across our owned and operated DWDM terrestrial and subsea fibre infrastructure. Our optical network spans more than 500 PoPs across Europe and North America. We are one of the only networks in the world, capable of seamlessly delivering a wavelength from Istanbul to Chicago on multiple, diverse paths.

Low latency

Leading latency for express results

EXA Express is a state-of-the-art transoceanic optical cable that offers the absolute lowest latency between North America and Europe — under 59ms from New York to London. Our low latency network infrastructure platform spans North America, Europe and Asia, including more than 60 unique routes and connections to more than 130 major financial exchanges.

Colocation facilities in Europe and North America

Dark fibre

Optimum capacity, control and security

For clients prioritising, security and control over their network, EXA's Dark Fibre portfolio offers a comprehensive set of services across a wide international footprint. Providing dense coverage both between and within all key European cities. Clients enjoy the advantage of interconnected capabilities with our partners, to extend their reach beyond our own network footprint.

Ethernet direct

High performance for pre-defined routes

EXA Ethernet services are designed for clients with smaller bandwidth requirements, and includes connectivity outside our owned fibre footprint. EXA Ethernet is an uncontended service with fixed routing, making it ideal for high availability, low latency and deterministic applications such as broadcast services and financial trading.

Colocation

Secure, flexible colocation options

EXA operates colocation facilities in Europe and North America. All of them fully integrated into our network, including 14 Tier3 equivalent datacentres. Within these locations we offer ultimate flexibility for configuration of space, power and connectivity options, including industry standard cabinets, cages, datacentre modules; with bespoke 'land and power' packages for unique deployments. EXA can provide remote hands and eyes, and cabling services at all our colocation

Our highly distributed colocation sites are ideally placed for Edge Datacentre applications

We are inspired and focused by a clear ambition

To be the most trusted dedicated infrastructure operator, serving the world's high growth, hyper bandwidth market.

The partners we serve

As bandwidth demand surges, the requirement for low latency, network redundancy and availability increases. These growth drivers have made EXA a trusted partner for:

- Hyperscale compute and social media platforms
- Content Delivery Networks and Internet backbones
- Satellite and Broadcast networks
- Service Providers
- Nextgen Broadband Providers
- Government and Defence contractors
- Research and Education Networks
- Fintech and BigTech

We excel at delivering the network scale of an industry heavyweight, with the agility of a light-footed challenger.

Here to help you succeed

EXA supports the world's most innovative organisations in the challenge to provide scalable connectivity. Whatever service your business provides, we are best placed to help you prosper.

Our clients rely on EXA's fibre optic network to meet specific capacity, diversity, and business requirements, but above all to help scale networks as their businesses thrive and grow.

At EXA, we provide the infrastructure focus and specialism that our clients need to achieve the business growth they want. Our expansive digital platform and responsive service enable us to exceed client expectations today. Our continued dedication to growth through infrastructure allows us to anticipate and solve their needs going forward.

The EXA difference

Challenge is inherent in what we do every day. But the working relationship we aspire to forge with our clients is the complete opposite. Whether it's in the bespoke design of a network build or the swiftness of a contract approval, we go to supreme lengths to remove every barrier to a smooth delivery.

We excel at delivering the network scale of an industry heavyweight, with the agility of a light-footed challenger. And it is our firm belief that by listening closely, respond rapidly, and acting decisively — amazing will happen.

A world changing network

Experts in infrastructure. Building connections

Our expansive fibre and transport network connects 6 continents by land and sea. It is trusted by over 1500 organisations to reliably move data at scale, wherever and whenever it is required. Our constant goal is to make sure that every message, video call, or critical business transaction, is sent over the most reliable and secure network infrastructure available. We're focused to building our global reputation for service excellence and enabling growth.

Who is EXA?

At EXA, we dedicate our energy, expertise and skills to one thing — the creation and delivery of infrastructure, meaning we own and operate one of the world's most extensive networks connecting Europe and North America.

In our business, our clients find partners; in our network, they find the access they need to new markets, new audiences, new possibilities.

Experts in infrastructure. Delivering growth.
